Greg isn't available and I'm out of the office on travel but expect to be able participate. I'll also contact Steve Wendelken and Glynda Smith, two of our analytical chemists and invite them to also sit in.

Greg and Dan, I will have nothing to contribute to this call, but wanted to make sure you are aware of it in case you want to sit in. -----Original Appointment-----

All,

REIC Laboratory reports they can detect PPh/DiPPH at less than 10ppb with 20 ml of sample. We are providing them with historic samples from 10-13 Jan so they can look back at those samples for PPh/DiPPH. They are reporting on the current samples at 1.04 ppb level. (Correct me if I am wrong)

**Ex. 6 - Personal Privacy**

Ex. 6 - Personal Privacy is planning on sending out conference call regarding PPh for 10:00 a.m., Monday 27 Jan.  
We appreciate everyone's assistance with this incident.

Thanks,  
Greg
